## TECHNICAL DETAILS

|                                    |                                          |
|------------------------------------|------------------------------------------|
| Net Passing Diameter (mm) / (inch) | 1250/49.20                               |
| Standart Dimensions (WxLxH)        | (2000x2200x1850) / (78.75 x86.50x 72.80) |
| Max. Rotational Velocity (rpm)     | 5 to 70 rpm                              |
| Total Weight (kg)                  | 500                                      |
| Installed Power (kw)               | 0.75 kw                                  |

## STRETCH FILM

|                                |                                |
|--------------------------------|--------------------------------|
| Max. Exterior Diameter (mm/in) | 200mm / 7.50 in                |
| Reel CoreDiameter (mm/in)      | 76 / 3                         |
| Film width (mm /in)            | (100/125/167) (3.94/4.92/6.57) |
| Recommened Thickness (microns) | 15,17,20,23,30                 |

## PRODUCT SIZE TO WRAP

|                                 |            |
|---------------------------------|------------|
| Max. Length (mm/in)             | No Limit   |
| Min. Lenth (mm/in)              | 400/15.75  |
| Max. Width for panel (mm/in)    | 1150/45.25 |
| Max. Height for cabinet (mm/in) | 700/27.50  |

**More Space**
